

354173 : JDP-17DX - 17" Drill Press

The new JET model JDP-17DX - 17" Drill Press was designed especially for the woodworker. Head mounted dual AC powered laser guide system provides an accurate drilling cross point on the workpiece. The poly v-belt drive system is quiet and free. This drill press also features a built-in work light to provide direct lighting on the workpiece. An extra large 14" x 18" work table provides plenty of support for large projects.

Features and Benefits

- Spindle mounted dual laser guide system provides a consistent drilling crosspoint on the workpiece
- Innovative extra large 14" x 18" work table features twin T-slot grooves for miter gauge and jigs, table has lip designed edge for easy clamping of workpiece and a removable insert
- Hinged metal belt and pulley cover provides easy access to the quick adjustment mechanism for rapid spindle speed changes
- Drill press head has integrated AC worklight
- Spindle has high-quality ball bearing construction for long life
